

AQUAstay tanks

for rainwater, drinking water and waste water

Economic and prudent management of valuable water has become not only an ecological but a vital necessity. With AQUAstay tanks you can see to the future of your environment today. In your apartment or house the water collected from tanks can replace the drinking water used for flushing toilets, washing cars and laundry and watering gardens.

**Protect your water sources today -
for a better tomorrow for your environment!
Choose AQUAstay tanks.**

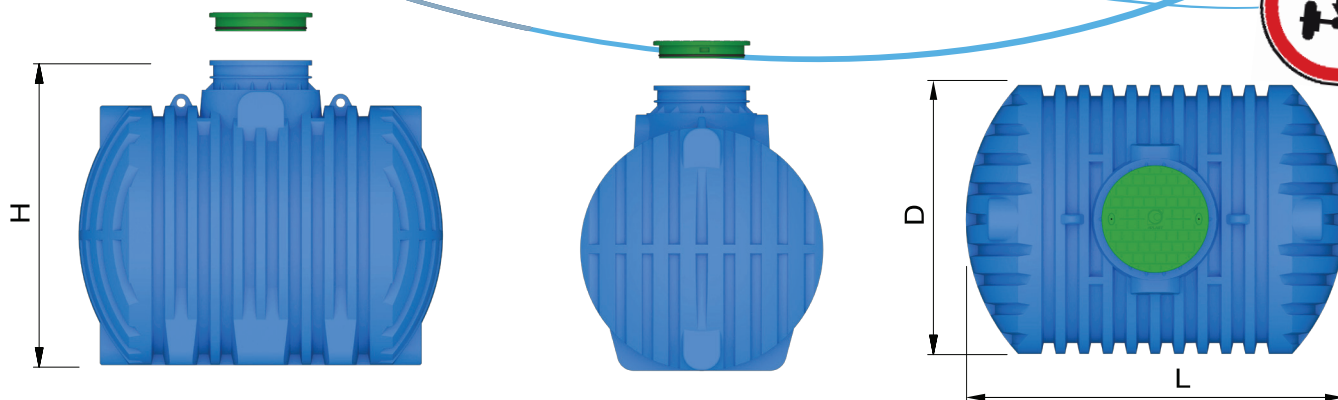

for rainwater

for drinking water
(Certificate W 270)

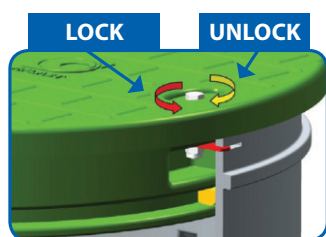

for waste water

VERSIONS AVAILABLE

Extension of an inspection chamber with rings or telescopic extensions

Security lock

AQUAstay tanks are distinguished by the following features:

- **HIGH QUALITY** - made from biodegradable polyethylene, which in suitable for drinking water and foodstuff materials have been tested for the growth of microorganisms (W270) at an accredited laboratory.
- **MULTIPURPOSE** - for rainwater, drinking water and waste water.
- **ECONOMICAL** - reduction in drinking water consumption - the investment is recovered within two to three years.
- **ROBUST CONSTRUCTION** - due to being manufactured with rotomoulding the tanks up to 12,000 l are available in a monolithic design (cast in one piece).
- **QUICK INSTALLATION AND EASY FOR USE** - low weight enables quick and easy transport and installation. The products are distinguished by practical use and quick and easy cleaning.
- **50 - YEAR WARRANTY** - on the stability of water tank (installed by the manufacturer's instructions).
- **ALWAYS IN STOCK** - organised transport and immediate delivery.
- **UPGRADE OPTION** - with the standard Aplast programme (custom - made rings and connections, sand traps, grease separators, etc.).
- **RESISTANCE TO FIRE** - class E standard SIST EN 13501.
- **LOAD** - the water tank may be installed into surfaces, where the static axial load of vehicles does not exceed 2.2 tonnes with a gravel bed depth of 0.8 metres. In such a case, the cast iron cover of suitable capacity has to be used.

AQUAstay water tanks

Volume	Height (H)	Diameter (D)	Length (L)	Weight
