URN NICHES for In-Ground and Lawn Burials

A Proper Place for Farewell and Remembrance

Niches have been developed with respect for the relatives of the deceased and in consideration of the needs of the providers of ground urn burials at lawn cemeteries.

Companies engaged in funeral services confirm that APLAST urn niches are the most suitable product for storing urns. They are made from high-quality polyethylene, which guarantees the following advantages:

- unlimited life,
- watertightness and an appropriate dimension of ribs for protection against buoyancy (areas that are exposed to larger underground streams),
- appropriate circumferential rigidity (impact resistance),
- low weight,
- reasonable price,
- constant supply.

	PRODUCT	DIMENSIONS W x L x H (mm)	CODE
	Urn niche 1/1	Ø 280 x 360	400050000
	Urn niche 1/2	470 x 280 x 360	400050020
	Urn niche 1/3	670 x 270 x 360	400050030
	Urn niche 1/4	480 x 480 x 360	400050040
