

WELDED POLYETHYLENE (PE) TANKS

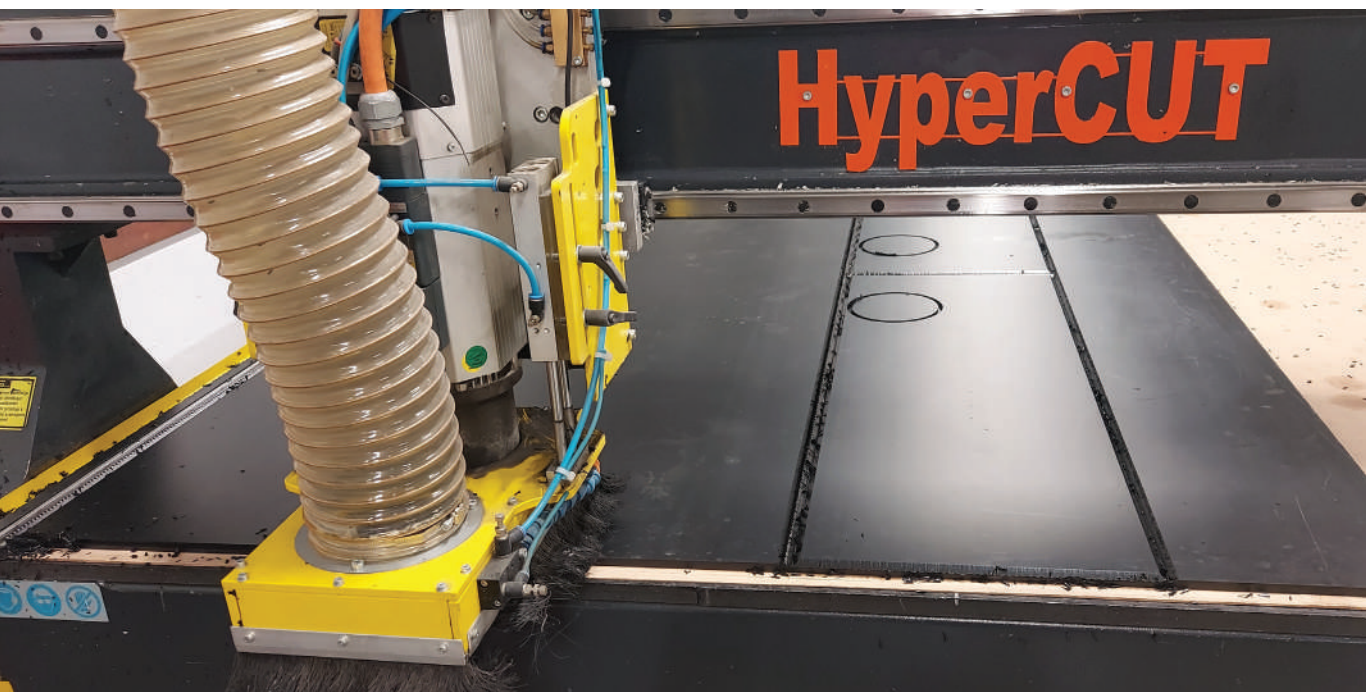

ABOUT US

APLAST d.o.o. is a manufacturer specializing in the production of a wide range of rotomoulding products, such as tanks for rain, drinking and waste water, water treatment systems, sewer inspection chambers, oil and grease separators, underground waste collection containers, etc. With more than 180 employees, we follow the principles of technological innovation, building our own brand and enjoying a high reputation in both domestic and international markets. For this purpose, we use the most advanced rotational moulding technology, which has the least impact on the environment and preserves the future of our environment.

Additionally we have many years of experience in the production of hand-welded polyethylene (PE) tanks for drinking and waste water. The advantages of those tanks for the customer are:

- Making a tank according to wishes or customer drawings.
- It is possible to make smaller quantities (even one piece) without the need to make expensive tools.
- We have equipment that also allows the production of partially curved shapes.

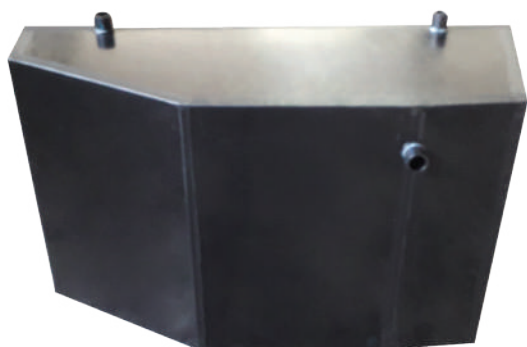

EXAMPLES OF OUR WELDED TANKS

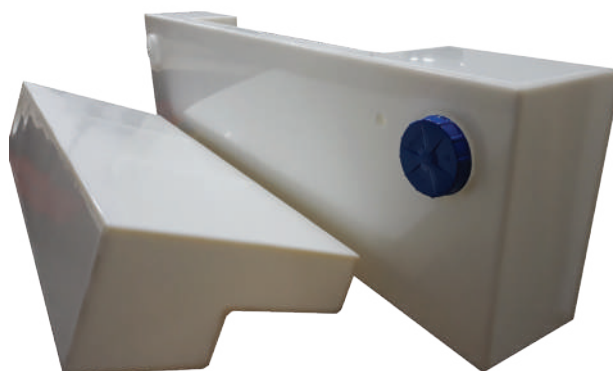

Long water tank (1,9 m length) with four lids

Edge water tank

Waste water tank 70 l

Drinking water tank 100 l

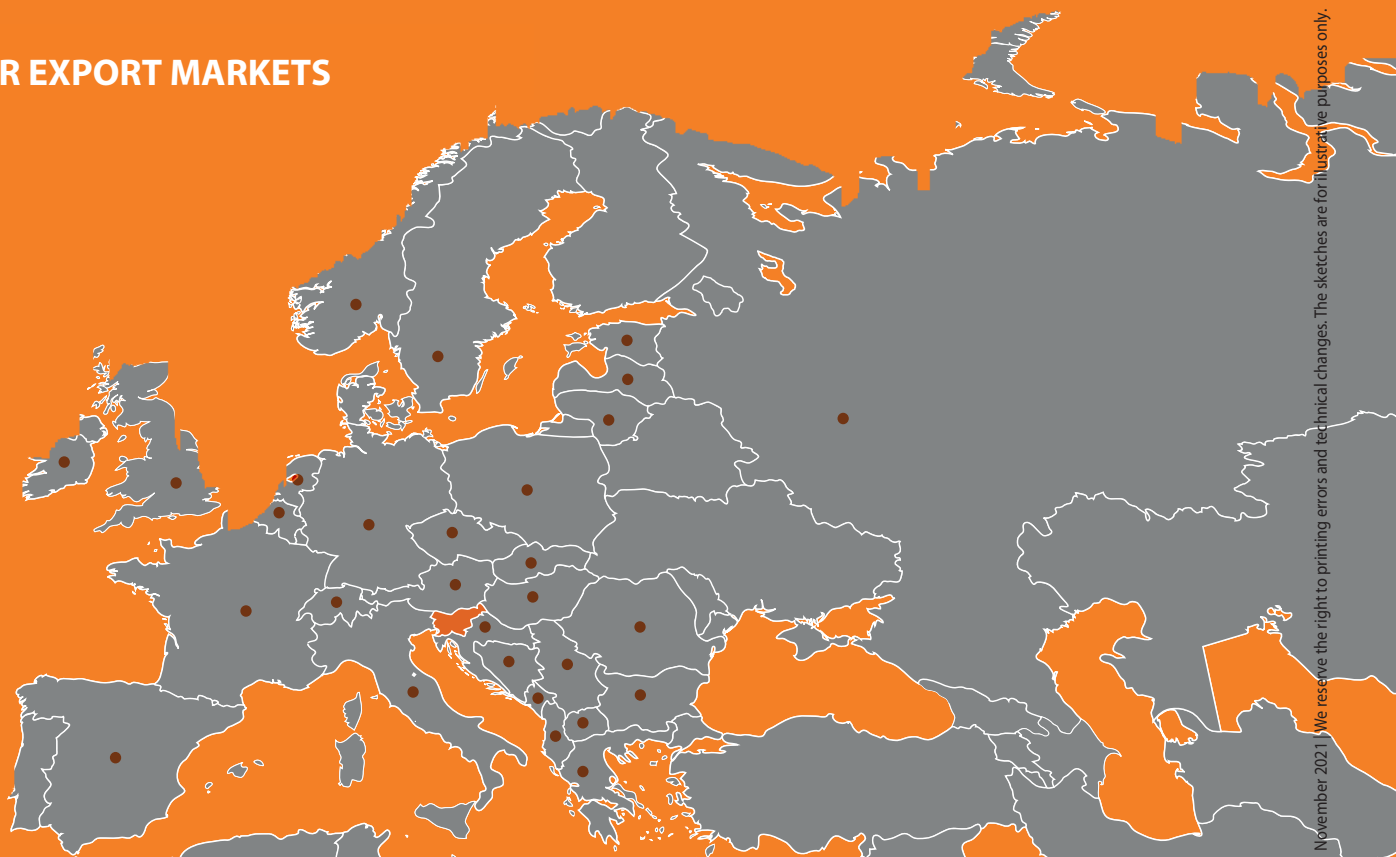

Tank with swelling walls

We are flexible and an innovative development partner of our customers with an excellence on all levels of business cooperation. We bring benefits to all target audiences, to the:

- CUSTOMERS – by offering them quality made products,
- EMPLOYEES – with professional and personal growth,
- SUPPLIERS – with expansion of business opportunities,
- STATE and LOCAL COMMUNITY – as an important, socially responsible employer.
